DCU School of Computing

Caddie
Documentation and Onboarding Assistant

Students: Tadhg Donnelly, Gavin Szumlicki *Computer Science*
Supervisor: Prof. Boualem Benatallah

The Problem
Important onboarding and project information is scattered across fragmented wikis and chats making it difficult to find and act on.

The Solution
Caddie transforms static documentation into an active, collaborative assistant.

- **Collaborative Hubs:** Centralise files, web links, and Youtube Videos into shared workspaces.
- **Grounded AI Chat:** Get answers with traceable citations linked to your source material.
- **Actionable Artifacts:** Automatically generate reminders, FAQs, and step-by-step guides.
